

# Continuing to ASPIRE

## Saint George Catholic College Alumni

### SUBJECTS STUDIED AT SAINT GEORGE:

Mathematics  
English Lit and Lang , Biology,  
Chemistry, Physics, History, RE ,  
French and Physical Education

### FURTHER/ HIGHER EDUCATION:

Peter Symonds College:  
English Language  
History  
Mathematics

Warrick University studying History

### BEN McCORMACK'S TIME AT ST GEORGE:

The History teachers at the school really inspired me to take History further at both college and University. I always remember really enjoying the lessons and a stand out lesson would have been a re-enactment of a Roman Battle on the fields with my own makeshift shield!

I really feel St George set me up for college, since the workload suddenly stepped up! But since our teachers instilled the ASPIRE Values and in particular Independence, I don't think I found the leap as shocking as those from other schools.

I really appreciate the fact that at the time St George was a small school, I felt I had good close relationships with all of the teachers and students. Most of the friends I made at the school are firmly life long friends that I still speak to now.

At my time at St George, I was head boy, and the role definitely helped with my confidence since it gave me opportunities to speak to public audiences at open evening and assemblies. These are skills that I found very helpful in the election process I recently went through to become the President of the Rugby League club at Warrick university!

My only regret at St George was not making the most of the extra curricular activities that were available to us, I certainly took part in Sports, but perhaps looking into other interests such as musical theatre would have been really useful and fun!
